

Managing triggers

To work with triggers in the Frosmo Control Panel, select **Triggers**. You can see a list of triggers created for the site.

To view the details of a specific trigger, click the trigger name.

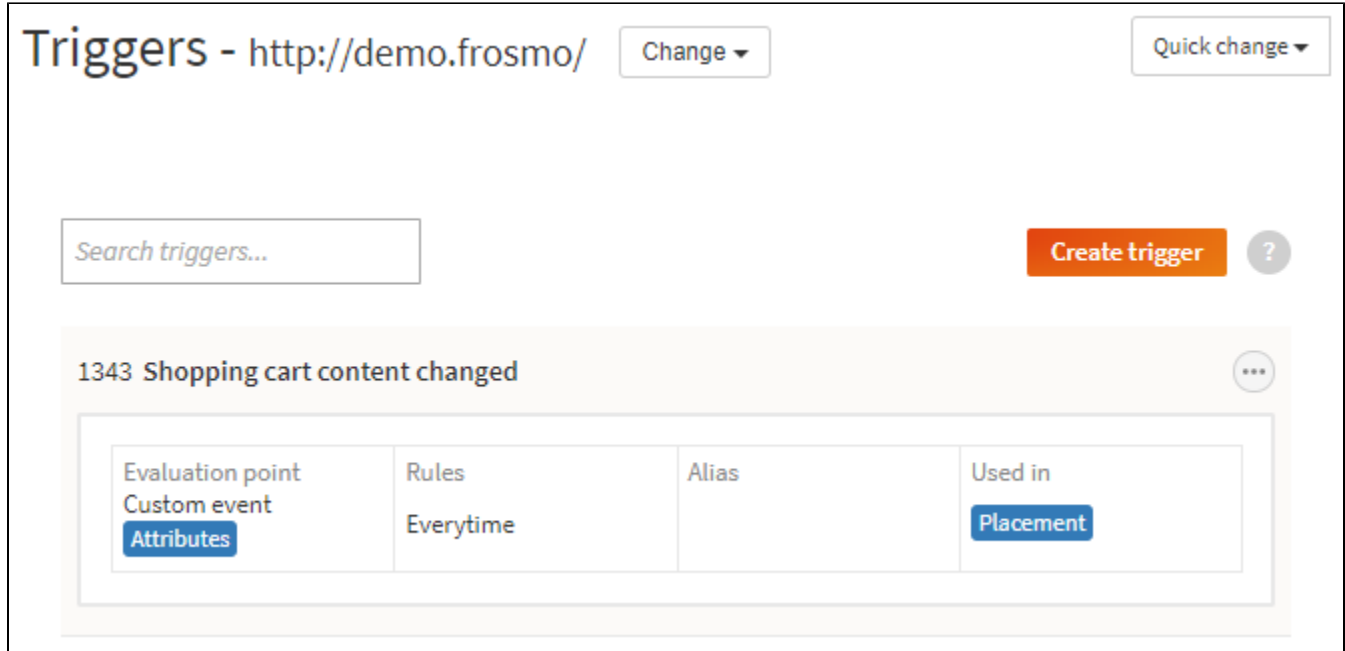

Figure: Trigger details

You can view to following information:

- Evaluation point
- Trigger rules
- Alias, if any
- Placements, conversion definitions, and other items in which the trigger is used

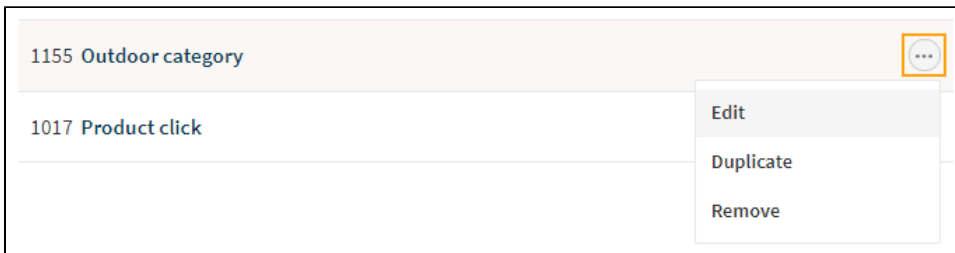

The Control Panel provides the following ways to manage triggers:

- [Edit a trigger.](#)
- [Duplicate a trigger.](#)
- [Remove a trigger.](#)

Editing a trigger

To edit a trigger:

1. In the triggers list, find the trigger you want to edit.
2. Click the quick menu button for the trigger, and select **Edit**.

3. Edit the trigger options. For more information about the options, see [Creating triggers](#).
4. When you're done, click **Save**.

Duplicating a trigger

To duplicate a trigger:

1. In the triggers list, find the trigger you want to duplicate.
2. Click the quick menu button for the trigger, and select **Duplicate**.

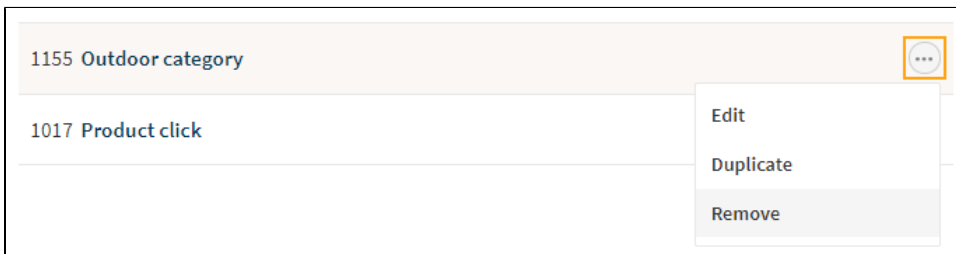

3. Click **Duplicate**. The trigger is duplicated, and the new trigger appears in the triggers list.
4. Edit the trigger options. For more information about the options, see [Creating triggers](#).
5. When you're done, click **Save**.

Removing a trigger

To remove a trigger:

1. In the triggers list, find the trigger you want to remove.
2. Click the quick menu button for the trigger, and select **Remove**.

3. Click **Remove**. The trigger is removed.
