

# Frosmo "Big Delta" 2018-03-19

## Release date

2018-03-19 at 08:30 ([admin.inpref.com](http://admin.inpref.com))

The Big Delta release contains several new features as well as some smaller improvements.

## Major changes

The Big Delta release contains the following new features:

- [Advanced tracking](#)
- [Error tracking](#)
- [Modification templates](#)
- [Power search](#)

## Advanced tracking

The advanced tracking feature extends the basic tracking functionality of the Frosmo Platform by allowing you to send additional tracking data, custom events, from a site to the Frosmo back end.

A custom event can be about anything that you can do with or change in a modification. The platform calculates statistics for custom events, and you can access the statistics through the Frosmo Control Panel.

You enable advanced tracking for a site in the Control Panel.

For more information about implementing advanced tracking, see [Tracking custom events with advanced tracking](#). For more information about viewing and interpreting modification statistics, including advanced tracking statistics, see [Modification statistics](#).

## Error tracking

The error tracking functionality of the Frosmo Control Panel allows you to track and troubleshoot errors on your sites. You can:

- Select which sites to monitor for errors.
- View the summary status of all monitored sites (latest errors).
- View the detailed status of each monitored site (all errors and other alerts).

When you're monitoring one or more sites, and if there alerts on the sites, you will see a warning icon in the upper right corner of the Control Panel. The icon represents the combined number of active critical alerts and warnings from all your monitored sites.

## Modification templates

Modification templates allow you to define the UI code for a modification once and then automatically reuse that code in other modifications. Frosmo supports [mustache.js](#) templates.

There are many benefits to using templates:

- You can use the same template in multiple modifications.
- You can separate data (for example, product data) from modification content structure.
- You can modify the data before displaying the modification.

You enable modification templates for your site in the Control Panel.

For more information, see [Feature: Template](#).

## Power search

The Control Panel now boasts a new, powerful search tool. The tool allows you to search basically anything and everything you can access in the Control Panel, including:

- Companies
- Conversion definitions
- Custom actions
- Labels
- Modifications
- Placements
- Sites
- Segments

- Segment groups and target groups
- Templates
- Triggers

To use the tool, click the search icon (🔍) in the upper right corner of any view in the Control Panel (you can also use the **Ctrl+Space** shortcut). Enter text in the search field, and you will immediately see a list of search results.

### Search ×

You can search anything related to your site(s), including segments, placements, modifications, templates, triggers, custom actions, and conversion definitions. To search, enter text in the search field

recommendation

#### Modifications

Id	Name
12659	(DEMO-1) Standard recommendation
13210	(DEMO-2) Cart recommendation
13397	(DEMO-4) Cart recommendation - with CG
14781	(DEMO-3) Standard recommendation
14782	(DEMO-5) Cart recommendation

#### Placements

Id	Name
4183	Standard recommendation - Home page- Before main recommendation
4398	Cart page - Recommendation slider

**Figure: Search results**

The search returns 50 results per result type (for example, modifications, placements, or sites) at the most. You can click a search result to access it directly.

## Improvements

- Control Panel, **Modifications > Overview > Modification**: The modification UI has been updated for a more consistent and user-friendly look and feel. The functionality of the UI has not changed.
- The Frosmo JavaScript library no longer supports Internet Explorer 9. The Frosmo Platform now supports the following IE versions:
  - Frosmo JavaScript library: 10 or newer
  - Frosmo Control Panel: 11 or newer
