

Selecting and editing multiple modifications

You can perform the following actions on multiple modifications simultaneously:

- Remove
- Duplicate
- Activate or deactivate
- Edit the schedule
- Edit the labels
- View and download statistics

To manage multiple modifications simultaneously:

1. In the Frosmo Control Panel, select **Modifications > Overview**.
2. At the top of the modifications list, click **Select**.
3. Select the modifications you want to manage. A menu bar appears at the top of the page.

4. In the menu bar:
 - To remove the selected modifications, select **Remove**, and click **Remove**.
 - To duplicate the selected modifications, select **Duplicate**, and click **Duplicate**.
 - To edit the selected modifications, click **Edit**, and select an option. You can activate or deactivate the modifications, or edit their schedules.
 - To manage the labels associated with the modifications, click **Labels**, and select an option:
 - To create a new label and add it to the selected modifications, select **Create new**, enter the label text, click **Save**, and click **Add**.
 - To edit an existing label, select **Edit labels**. Click the name of the label you want to edit, edit the label text, and click **Save**.
 - To add an existing label to the selected modifications, select the label, click **Add**, and click **Add** again.
 - To remove a label from the selected modifications, select the label, click **Remove**, and click **Remove** again.
 - To view the statistics for the selected modifications, click **Statistics**, and select a time period. A table with the statistics opens.
 - To download a basic statistics report for the selected modifications:
 - a. Click **Statistics**, and click **Download report**.
 - b. Define a time period for the report, and click **Download**. A report file is generated and downloaded to your computer. The file is in the Microsoft Office Open XML Workbook (XLSX) format.
