

Checking the status of recommendation data generation (Frosmo Control Panel)

You can check the data generation status and duration for a [recommendation configuration](#) in the Frosmo Control Panel.

- [Checking the status of recommendation data generation](#)
- [Checking how long it took to generate recommendation data](#)

If you're creating your own Frosmo application, you can get the data generation status and duration with the [Graniitti API](#).

Checking the status of recommendation data generation

To check the data generation status for a recommendation configuration:

1. In the Control Panel, select **Data Management > Recommendations > Configurations**.
2. In the recommendation configurations list, find the configuration you want to check, and check its status next to the quick menu button.

Most purchased products 106 / Top 5 most purchased products in the past 10 days	Success
Most viewed affordable pants 2030 / Top 5 most viewed pants in the past 14 days that cost less than 30.00	Success
Products purchased together 99 / Top 5 products purchased together in the past 14 days	Scheduled

The status can be one of the following:

- **New:** Recommendation data generation has yet to be scheduled.
- **Scheduled:** Recommendation data generation has been scheduled. Depending on how many other recommendation configurations are in the queue, it might take anywhere from a fraction of a second to several minutes before the data generation starts.
- **Started:** Recommendation data is being generated.
- **Success:** Recommendation data was successfully generated.
- **Failure:** Recommendation data generation failed.

The status updates dynamically on the page, so you don't have to refresh the page.

Checking how long it took to generate recommendation data

To check how long it took to generate the data for a recommendation configuration:

1. In the Control Panel, select **Data Management > Recommendations > Configurations**.
2. In the recommendation configurations list, find the configuration you want to check, and click to expand its row.
3. Check the **Last successful generation time** field.

Most purchased products 106 / Top 5 most purchased products in the past 10 days				Success
Configuration created	Configuration modified	Model modified	Last successful generation time	
28.08.2019 14.09.56	07.10.2020 10.53.29	07.10.2020 10.53.09	a few seconds
