

Testing

Learn how to test and debug your visitor journeys and the features used to build them.

- [Frosmo Preview](#) allows you to preview and debug how the Frosmo Platform is working on your site.
- [Test mode](#) allows you to show modifications only to certain visitors for testing purposes.
- [Testing data tracking](#) shows you how to check whether data tracking is collecting the correct data and otherwise working as expected on a site.
- [Testing in incognito mode in Chrome](#) shows you how to allow third-party data in incognito mode in Google Chrome, so that you can test sites that uses shared context.
